DESCRIPTION

Item number 7

Page 2

Of the 523 structures encompassed by the Old Town Triangle Historic District, 198 have been evaluated as significant architecturally, significant historically, or both. When rear dwellings of the significant structures are included, the total becomes 213. 224 structures have been identified as contributing to the character of the District. These structures contain an additional 32 rear dwellings which brings the total to 256. 19 of the non-contributing structures built before 1930 have been so classified because of the structure being architecturally altered to a point where they are difficult to restore. 35 are identified as non-contributing because they are new construction built after 1960. The non-contributing category also includes those structures considered intrusive.

It appears that there was no new construction between 1928 and 1961. This was the period when imaginative new restoration began.

FURTHER DETAIL OF CRITERIA FOR SIGNIFICANCE, GROUPINGS, NUMBERS AND CODES:

Except for the 19 built-before-1930 non-contributing and 34 new non-contributing structures, the whole area is of architectural and historic significance. Our criteria is based on buildings in pristine condition with most of their original parts. Code notes have been made for 1) a changed front door; 2) removal of steps to the second floor; 3) altered fenestration; 4) aluminum siding; and 5) buildings that are in original architectural shape regardless of current condition. Excluded from judgement and evaluation are paint, front fences, added shutters and, except for frame cottages, front steps. More than one change has not been allowed unless the historical significance outweighs the change (#40, #110).

A list accompanies each map showing structure number, building material used, followed by the alphabetical code representing other categories or comments. Explanation of the code appears in the map section.

Rowhouses have each been given a number. The R (Rowhouse) code has been given to all townhouses built together even if they are not alike. Buildings with two entrances which are basically one building have been assigned one number. Garages are numbered separately. Rear houses have been noted D (Dwellings with livable rear buildings), but not counted in the total except for #144. Existing horse stables are marked with an H.

Describe the present and original (if known) physical appearance

SUMMARY:

The Old Town Triangle Historic District is a distinctive area, a charming and cohesive District located within walking distance north of Chicago's Loop. Starting at State and Madison streets, the zero center of Chicago's modern street numbering, the District begins approximately 16 blocks north and two blocks west. The District's eastern borders look toward the south end of Lincoln Park. There is a pleasing variety of small-scale buildings of well-maintained integrity on tree-lined streets. It is overseen by the spire of a major functional church complex. Most of the architectural styles popular in Chicago from the 1871 fire through the 1980's are represented, with several recognized as excellent architectural examples.

Early beginnings of the district were as farmlands north of North Avenue, the northern border of the Chicago City Limits. The plat of streets originated as land of the District was subdivided, beginning in 1845. Chicago received its first geographical location in 1830, and twenty years later annexed the land in 1850-51. Two of the three boundaries of the District are based on the early grid plats. The third, or hypotenuse boundary of the Triangle, follows the extension of Ogden Avenue, a depression-era "make work" project, since vacated.

Considerations of the specific boundaries include concentration of architectural styles and the locations of intrusions.

Land uses within the District are primarily residential. Institutional land uses are composed of schools and churches: La Salle Language Academy, St. Michael's Church and the Hermon Baptist Church.

The street pattern in the Old Town Triangle District is a modified grid. Some streets begin and end within the District, some being only a block long. The heaviest traffic carriers are Wells Street, Sedgwick Street, and Lincoln Avenue. The remaining streets primarily carry local neighborhood traffic. The District contains abundant mature vegetation.

The average residential density is 17.4 structures per acre. The concentrations are primarily small houses on small lots with narrow setbacks. There is a mix of three- and four-story brick flats found in the District intermixed with brick, brick-and-frame, and frame cottages. The Old Town Triangle Historic District contains an early urban working class fabric.

Statement of Significance (in one paragraph)

The Old Town Triangle Historic District is reflective of the early growth and development of Chicago and represents the early urban character and fabric of the city of Chicago. Both architectural and historic significance are the common elements that unify the District. Our criteria is based on buildings in pristine condition representing architecture from the 1871 Chicago Fire to 1899 as well as architecture from 1900 on. Exceptional significance is attached to many buildings, including the churches which represent the social and humanitarian areas as well as the area of religion. The whole District is of Historic Significance. History, architecture and other related areas of significance will become apparent from the historical narrative and discussion of individual sites.

HISTORY:

The first white pioneer in the Old Town Triangle Historic District was French, just as to the French belongs credit for the first development of Chicago. Beginning in 1673 with Marquette and Joliet, then Robert Cavalier, sieur de la Salle in 1679. After the war of 1812 the French arrived in greater numbers and for many years they dominated the social and political life of Chicago and adjacent settlements. In 1825 nearly all of the names of Chicago's first fourteen taxpayers are those of Frenchmen.

In 1839 the Chicago City Directory listed Charles Canda, a Frenchman, farming in the future Old Town Triangle Historic District.

The next pioneers to settle in this area north of the then city limits of Chicago were immigrants from the southern states of Germany, in the mid-1800's. Mainly farmers and semi-skilled workers, they came to the city of Chicago first, then from 1846 for the next several years began to move north beyond the city limits to the meadows above North Avenue, and west of the swamp which was later drained and became Lincoln Park. Here they grew celery, cabbage and potatoes and kept cows and chickens.

Soon prominent Chicagoans bought tracts of land in this district. Stephen Gale, the first stationer in Chicago and the first Fire Chief, purchased land here which he subdivided in 1845. William B. Ogden, first Mayor of Chicago, bought property here in 1856. Charles J. Hull, attorney and real estate dealer, whose developments ranged from Savannah to Baltimore and Houston, subdivided a large

received
date entered

Continuation sheet SIGNIFICANCE Item number 8 Page 2

portion of the area. Hull was a socially conscious man who gave his home to what was to become the world-famous Hull House. Other prominent land owners were William Rand and Andrew MacNally, map publishers.

The city annexed the land in 1850-51, and the population grew, and became more varied. Irish truck farmers arrived and settled, as did Italians from Lombardy. Several more settlers of French origin purchased land close to the Germans around St. Michael's Church. By the 1860's, population of North Town (the appellation of Old Town began after World War II) was either truck farmers or the semi-skilled who made shoes, cut cloth, brewed beer, joined wood, loaded grain elevators on the Chicago River, or laid rails for the Chicago and Rock Island Lines.

The Great Chicago Fire of October, 1871 flattened the area.

It was quickly re-built. Lincoln Park was established, new residents were attracted and their homes gradually replaced truck farms. Several were well-to-do. In 1874 Frederick Wacker built his house here. Prominent restaurateur Phillip Henrici built his mansion, and Johann Tonk, with the help of a French architect, built the Angel Door house. Still, the neighborhood remained diversified as the working class artisans continued to live there.

Florimond Canda inherited some of his brother Charles' property. A French Colonel under Napoleon, Florimond settled here later. He sold the property in 1884 to developer Daniel F. Crilly who began the construction of Crilly Court. It was a place that would be home to many notables, including poet and journalist Eugene Field, and early movie producer George K. Spoor, noted for his Keystone Cops and Charlie Chaplin comedies.

New houses were interspersed with garages with living quarters for chauffeurs employed by wealthy homeowners who lived south of Lincoln Park in the Gold Coast. These were prominent Chicagoans: John G. Shedd, Chairman of Marshall Field & Co., Phillip and Watson Armour, Frederik Rawson, President of the Union Trust Co., Alfred E. Cowles, Chairman of the Rialto Trust, Edward A. Furst, head of the Miehle Printing Press Co., John Harding, restaurateur, and Mr. Sprague, of Sprague-Warner. Today, most of these garages have been converted to family residences.

Continuation sheet SIGNIFICANCE Item number 8 Page 3

This was a time when residential construction was moving so rapidly that the aesthetic impact of the owners was so strong that the demand for individual expression was in constant conflict with the conformity thus far considered.

In the early 1900's, North Town stopped growing. However it retained most of its original character. The visual scale of the area was maintained, and only the spire of St. Michael's rose above the rooflines of North Town. The character and charm of the neighborhood was assured by the renewal of community spirit in the 1930's. Edgar Crilly, son of the original developer of Crilly Court, rejuvenated his buildings and his efforts inspired others.

After World War II, the name Old Town came into use and the Old Town Triangle Association, which has done much to promote community spirit, was formed in 1948. Early June two years later saw the first annual Old Town Art Fair. It is now a yearly event of national proportions, and is the oldest juried outdoor Art Fair in America.

In 1956 the Old Town Art Center was founded by the Old Town Traingle Association and opened its doors at 1714 North Wells Street. In 1959 using proceeds from the Art Fairs, a program of planting hundreds of flowering fruit trees along the streets and sidewalks began.

In 1964, the neighborhood agreed to become Project I of the Lincoln Park General Neighborhood Renewal Plan of the Department of Urban Renewal and the Federal Government.

Laudatory articles about the Old Town Triangle appeared over these years in the Wall Street Journal, the New York Times, Time magazine and many other national publications.

The Historic American Buildings Survey (1967) and the Illinois Historic Structures Survey (1972) resulted in many structures gaining a place on the permanent list in the Department of Conservation in Springfield and the Library of Congress, Washington/

On September 28, 1977, the Chicago City Council accepted the recommendation of the Commission on Chicago Historical and Architectural Landmarks, and unanimously voted to designate the Old Town Triangle as an Historical Chicago Landmark.

SELECTED SITES AND STRUCTURES OF SPECIAL SIGNIFICANCE

Numbers refer only to the accompanying map and are not a ranking.

1. TRUMAN W. MILLER RESIDENCE AND ROWHOUSES
1760-66 North Clark Street
Built 1886

This brick and stone structure provides a gateway to the eastern entrance, from Lincoln Park, into the Old Town Triangle Historic District. Notable is a handsome corner turret, and slate Mansard roofs. There is a brick and stone base at the first floor of 1766. Stone lintels with headers over the entry doors. The stairway and bannisters are original. Dr. Miller was a physician with a practice at 1071 North Clark Street. (Nos. 1,2,3,4 on the map)

ARCHITECTURAL SIGNIFICANCE

5. JOHN H. LEHNER RESIDENCE
1808 North Clark Street
Built 1884

Brick construction, with eyebrow arched Joliet limestone and scrollwork. Ornamental brickwork below the sill. The stairway is original; railings have been replaced.

ARCHITECTURAL SIGNIFICANCE

6. RESIDENCE
1810 North Clark Street

A three-story brick structure, with elaborate cornice and carved brackets. Corbelled brickwork just below the cornice, and below second story windows. Incised hoods over the windows. The stairway has been altered.

ARCHITECTURAL SIGNIFICANCE

7. ADOLPH OLSEN RESIDENCE AND ROWHOUSES
1908-1914 North Clark Street
Built 1881

These three buildings are meant to give the appearance of one building. Each of the separate parts is indistinguishable.

14. THERESA PROSSER RESIDENCE
 1640 North Cleveland Avenue
 Built 1873

A 2½ story brick cottage, with carved window hoods and gabled arches. There is Joliet banded limestone with flowered scrollwork. The door has been altered, but the significance outweighs the change.

ARCHITECTURAL SIGNIFICANCE

15. NICHOLAS BIRREN RESIDENCE
 305 West Concord Place
 Built 1882

Brick cottage of a form more typically implemented in wood frame. Very interesting example proving it can be done either way.

ARCHITECTURAL SIGNIFICANCE

16. PATRICK RIORDAN RESIDENCE
 324 West Concord Place
 Built 1900

Louis Sullivan type elaborate stonework. Fine brickwork. Mr. Riordan was an engineer. Notable feature of this building is the large second story projecting bay. It has the original cast iron fence across the front. The large arched opening contrasts well with the size of the projecting second story bay. Very austere building.

ARCHITECTURAL SIGNIFICANCE

17. HEINRICH FISHER RESIDENCE
 329 West Concord Place
 Built 1877

This two story raised cottage was completely restored to its original brick facade. Heinrich Fisher was a typical working class resident whose profession was Stonecutter.

CRILLY COURT

Bounded by St. Paul Street (N), Wells Street (E), North North Park Avenue (W), and Eugenie Street (S).
Built 1885-1893
Developer: Daniel F. Crilly

To trace the history of Crilly Court, it is important to look at the history and origins of land ownership surrounding and including the property. Stephen F. Gale, Chicago's first stationer and first Fire Chief, owned forty acres of country farm and meadowland just north of the city limits. He subdivided the land in 1845. The forty acres spread east from Sedgwick Street to La Salle Street. From North Avenue, then the northern boundary of the city, the property stretched north to Menomonee Street. Five and six years after it was subdivided, Chicago annexed the land in 1850 and 1851. It was then that Charles Canda, a Frenchman, bought the inside lots at the heart of it all. Those lots were from Wells to Sedgwick, and from Eugenie to St. Paul.

Approximately where Crilly Court is now, Canda owned a home and a barn with a large number of fruit trees. After he died in 1854, Adele, his widow, took the west half and Florimond, his brother, took the east. (St. Paul Street was Florimond Street until 1936). Colonel Florimond Canda, who had fought at the battle of Waterloo under Napoleon Bonaparte, was awarded a medal by Napoleon III and the Empress Eugenie, before coming to settle in Chicago in 1843.

It was Colonel Florimond Canda (Ret.) who sold the property to developer Daniel F. Crilly in 1884. The Chicago Surface Lines Company, occupying the tract as a car barn for street cars, found barn requirements would be better served by moving further north as the city grew.

Daniel Crilly created a street through the middle of the block, from St. Paul to Eugenie, which he named Crilly Court. He built the four story buildings on the east side of North Park Avenue. He purchased the building material from the building that stood where the present Germania Club building stands at the northwest corner of Clark Street and Germania Place. He also moved a three-story brick building from that site to the southeast corner of St. Paul and North Park Avenue, where it stands today.

Crilly then erected 12 small houses on the west side of Crilly Court. Subsequently, in 1893, he built the Wells Street block of stores and apartments. Finally, he built the four-story building on the east side of Crilly Court. Above the doors of the apartment buildings are carved the names of Crilly's children: Isabelle, Oliver, Erminie, and Edgar. Two other doorways are marked Eugenie and Florimond.

The building that fronts on Wells street is characteristic of a building type in Chicago. In the Commission on Chicago Historical and Architectural Landmarks Guidelines, "Twelve Typical Building Types", this building is used as a model, and illustrated with a photograph, of the category STORE FRONTS WITH APARTMENTS ABOVE. The structure is particularly handsome as an example because of the bay windows and the iron columns. Picturesque and inviting, it truly livens up the street.

Over the years, much remodelling has taken place. The Crilly building originally contained 40 apartments. In about 1946, it was divided so that there are now 64 apartments. The houses have been extensively re-done by the individual owners who for the most part carefully preserve the exteriors

Continuation sheet SIGNIFICANCE Item number 8 Page 9

The Crilly estate through the years leased a number of units to well-known Chicagoans. Eugene Field, poet and journalist, was one, and Cy deVry, Lincoln Park Zoo Director for many years, was another. George K. Spoor occupied a Crilly Court apartment for many years. An early movie producer, Spoor was known for his one and two-reelers made in Chicago, featuring Charlie Chaplin. Chaplin wrote, directed and starred in 16 comedies for Spoor. Spoor was noted for his Keystone Cops, and movies with Ben Turpin and Francis X. Bushman, who gave our Zoo gorilla his name.

In order to preserve the films it was necessary for Spoor to keep them in his icebox in Crilly Court.

Commercial artist Haddon Sundbloom lived for many years in an apartment above the Wells Street stores. Sundbloom was the creator of the kindly man on the Quaker Oats box, as well as Aunt Jemima. For over thirty-five years his Coca-Cola Santa was an annual Christmas feature all over the world. His renderings of Santa were sometimes a self-portrait, and other times were drawn from another Crilly resident, the bakery wagon driver Boots Hansen. Children in the scene were modelled by the children of Crilly grocery store owner and proprietor Dick Slotten.

ARCHITECTURAL AND HISTORIC SIGNIFICANCE

33 through 37

ROWHOUSES

164, 166, 168, 170 and 172 West Eugenie Street
Architect: Harald Hansen
Built 1886

This is an extremely rare variegated row of five opulent Queen Anne style houses, heavily ornamented with a sheet metal frieze. There are three very individual chimneys coming out on the side of the terra cotta ornamentation. Numbers 164, 166, and 172 are the only houses in this area having bricks in Flemish bond. The Mansard on 172 is Vermont slate on three sides, with Flemish bond brick covering three sides. There are a variety of window shapes, including bays. Stained glass windows. Unusual porches.

Harald Hansen was a Norwegian-born architect who received his training in Heidelberg and later became head of the

United States Department of the Interior
National Park Service

received
date entered

Continuation sheet SIGNIFICANCE Item number 8 Page 10

department of architecture at the University of Illinois. He built 12 units; three on Wells Street and nine on Eugenie. Only these five listed above remain standing today. Hansen's own home was 164 West Eugenie. The houses were built on land previously owned by the Chicago City Railway Company, whose structures included a car barn and a blacksmith shop.

Mr. Hansen's two daughters, Carrie and Goldie, resided at 164 Eugenie most of their lives. Carrie, a schoolteacher at Nettlehorst Public School, observed her father never made any money on his houses because "He constructed them too well". In a letter from Carrie to her friend Helen Degenhardt she relates how poet and journalist Eugene Field and his lively sons rented one of her father's buildings (1707 N. Wells Street). Field's sons were having a Wild West Show in the basement when Carrie's father arrived to check his building. He discovered one boy tied to a post with a bonfire at his feet. Hansen arrived just as another boy was about to touch a match to the sticks. The boy --and the house--were rescued in the nick of time.

Other notable people lived in the Hansen buildings. Dr. Gradle, a world-famous eye surgeon, had his house and office at 160 Eugenie. At one time Eugenie Street between Clark and Wells was called "Pill Row" since many of its residents were doctors.

Jessie Bartlett Davis, a renowned turn-of-the-century opera singer, lived at 162 Eugenie with her husband Will Davis. They owned the Iriquois Theatre, which was destroyed by fire in 1903. Over 600 people were burned or trampled to death in that disaster.

Harald Hansen died in 1922. His daughter Carrie lived until 1966. A copper bust of Carrie is seen on the roof of 172 West Eugenie. The bust was modelled and erected by current owner Charles Hughes in November, 1982.

Built 1899

Part of the St. Michael's Church complex. Discussion under No. 54.

ARCHITECTURAL AND HISTORICAL SIGNIFICANCE

54. SAINT MICHAEL'S CHURCH (Roman Catholic)
447 West Eugenie Street
Built in 1866-69 and 1871-72
First builder: Waldbaum. Architect: Herman J. Gaul

In 1852 the German emigrant population in what was then called North Town had increased markedly. In July of that year Reverend Anthony Kopp presided over a meeting of prospective parishioners concerned with their status. Present was Michael Diversey, part owner of Diversey and Lill brewery at Chicago and Michigan Avenues, and owner of a great deal of farm land in

SIGNIFICANCE

Item number 8

Page 15

North Town. He offered to deed a plot of ground at North and Hudson Avenues for a church. In four months a frame church, forty by sixty feet, was built at a cost of \$730 and dedicated to St. Michael, in honor of Diversey. In 1854 a school was built and the modest church and parochial school became integral parts of the community.

The members of St. Michaels were from forty-nine different German states. They were businessmen, small shopkeepers, tradespeople and artisans who formed here a solid middle-class sector. They had left Germany after unsuccessful attempts to gain power for the middle classes during the aborted revolution of 1848.

Reverend Joseph Mueller, a Redemptorist Father, took charge of St. Michael's in 1860. He encouraged the parishioners toward a unity and solidarity which overcame their diversity of customs. Energies were channelled into building much needed community facilities. A new school, a home for priests, and a convent were soon put up. The cornerstone of a new, larger church was laid in 1866 at the corner of Eugenie Street and Hudson Avenue, diagonally across the block from the old church. This new church, predecessor to the existing structure, was completed in 1869. A year later, a new rectory for the priests was built to the south of the church, facing Cleveland Avenue.

St. Michael's was firmly established as the central institution of the area before the Chicago Fire of 1871.

The Church was built of locally produced red brick. The parishioners would have preferred stone, but at that time the working class people could not afford it. Still, the Church was of grand proportions. The gable-roofed entrance facade contained three doors with elaborate windows above. Limestone trip accented the windows and the niches between them, and simplified versions of the same motifs were used on the other walls of the Church.

Page 16

Flames from the fire of October 8, 1871, fanned by high winds, reached the Church late the next afternoon. The new school, rectory, convent and church were gutted. Only the solid brick double walls on the south, east and west of the church remained. Even the new church bells lay melted on the ground. The disaster did not dampen the community spirit of the parishioners, for they gathered and began to clean up and reconstruct immediately. The industrious plain people recreated the Church themselves. One year and three days after the fire, St. Michael's was restored to its original form, complete to the 190 foot long nave. That's a long way for a bride to walk.

Repeated redecorations, embellishments and alterations reveal the German heritage of the parish. In 1881 the interior was decorated by Karl Lambrecht, an artist from New York. The current color scheme of off-white, light blue and gold is reminiscent of Bavarian Baroque, popular throughout Austria and parts of Germany. The panels of the ceiling are painted with gilded interlacing designs. Gilt accents the ribs of the vaulting and the supporting columns.

In 1902 the church acquired five altars. The Romanesque style high altar, fifty-six feet tall and unique in design, contains a representation of St. Michael in his glorious victory over Satan and the infernal legions. The extraordinarily tall stained glass windows were brought from Munich, from the Mayer Window Wart Institute. In 1925 the rose window was obtained from the same Institute and placed over the Choir and organ loft. It depicts St. Cecelia, patron saint of music.

The exterior was re-done in 1888 by Chicago Architect Herman T. Gaul, who also added a steeple to the tower. The gilded cross on top is 24 feet 4 inches high; the cross beam is 9 feet 2 inches long. It stands 290 feet above the street and weighs just over a ton. (2,235 pounds). At the dedication, acrobats from a circus in town performed breathtaking stunts, electrifying the crowds below by hanging by their heels from the cross beam.

The steeple clock, a Schwalbach installed in 1889, is sometimes called "Chicago's Clock". It is visible to high rise residents throughout the city's central area, to the north, and to the west as well as to Old Town Triangle residents, and sailors on Lake Michigan.

St. Michael's parishioners have gone on to make their marks in all walks of life. Norman MacLeish, for one. Fred Hillenbrand, Rector of the American College in Rome; Ambassador Hillenbrand to Germany; Harold Hillenbrand, head of the Loyola School of Dentistry; as well as Nick Castiglione, the prize fighter. Johnny Weismuller was an altar boy, and James Rochford became Captain of the Chicago Police, just to name a few. I.H.S.S. 1972 N-740/7a; N-740/8a; HABS form (1957) O.T.D.S. (1977).

88. SAMUEL ANDERSON APARTMENT BUILDING
 1814 Lincoln Park West
 Built 1878 (rear 1/3 section), 1886 (front 2/3 section).

The facade of this four-story walk-up is appointed with the plastic artistry of terra cotta. These include the lunette at the top of the bay and the window spandrels. Samuel Anderson was a commercial merchant.

ARCHITECTURAL SIGNIFICANCE

89. TONK/GERSTENBERG RESIDENCE
 1817 Lincoln Park West
 Built 1874

Johann Tonk arrived in Chicago in 1857. After the 1871 Chicago fire he built a frame cottage on the back of the lot at 1817 Lincoln Park West, then began the building of the main house under the direction of a French architect, name unknown. Tonk's son Max, a master wood carver, created two hand carved doors with angels in heavy relief. Thus, the Angel Door House".

Erich Gerstenberg purchased the house in 1881. The top floor laundry of the Tonks was converted into a ballroom, the scene of gala parties.

The Gerstenberg Commission House is still operating in the Chicago Board of Trade. Gerstenberg's desk remains there, holding memorabilia of his days trading in gold, grain and malt. The Gerstenbergs were one of the original 290 customers of the Chicago Telephone Exchange in 1878.

ARCHITECTURAL SIGNIFICANCE

91. through 95.

ANN HALSTEAD TOWNHOUSES (THE SULLIVAN ROW)
1826 to 1834 Lincoln Park West
Built 1884 (1826, 1828 & 1830) and 1885 (1832 & 1834)
Architect: Louis Henry Sullivan

A group of five brick row houses, these are among the few surviving examples of Sullivan's early (he was in his late 20's) architectural design and planning. Close observation will show that the terra cotta ornament on the facade is not quite the same on the North and the South halves. The corbel brackets on the North two have a more vegetative origin and are less geometric than the three to the South, the first houses to be built. In the ornament to the South, the debt is more pronounced to Sullivan's early mentor, the eloquently original Philadelphia architect Frank Furness.

 Built 1874

Delicate wood framing with masonry style, delicately arched in wood with decorative keystone. Original moldings, cornice and brackets. Stained glass over entrance door showing original Franklin Street number.

ARCHITECTURAL SIGNIFICANCE

99. CHARLES WACKER HOUSE
 1836 North Lincoln Park West
 Built 1884

Wood frame house with small eave brackets, intricate turned columns and wood fretwork for entrance canopy in floral motif with delicate metal filigree on canopy roof. The large front bay window with incised fluted exterior casings in the classic manner on a base with capitals extends out in a plan at the ground floor which is sympathetically emulated by the sloping fascia of the entrance canopy.

Charles Wacker (1856-1929) was the son of Frederick Wacker (#100). The youngest director of the World's Columbian Exposition of 1893, he was a brewer, a building association man, active in German musical affairs, and a supporter of the Chicago Symphony. Mayor Fred Busse appointed him Chairman of the Chicago Plan Commission, where he served for 17 years. Obtaining massive public support for the "Plan" he was instrumental in implementing the Burnham Plan. He was an important figure in the molding of the City of Chicago.

Item number 8

Page 25

100. FREDERICK WACKER RESIDENCE
1838 North Lincoln Park West
Built 1874

The unusual house that Frederick Wacker built has a fairy tale quality about it. It has all the characteristics of a Swiss Chalet, combined with an Italianate feeling. There is a wide over-hanging veranda supported by curved brackets, openwork hoods above the windows, and carved wooden spindle railings flanking the broad stairway. There is a coachhouse in back.

Although other houses in the area utilize interesting carved wooden trim, none approaches the picturesque quality of the Frederick Wacker house.

Frederick Wacker was a forty-eighter. He earned his living as a brewer. Before he established his own brewery he worked with Michael Diversey. Wacker was a founding member of organizations such as the Sharpshooter's Association and the German Singing Society. He was highly regarded as a leader in the German community.

ARCHITECTURAL AND HISTORICAL SIGNIFICANCE

101. ELIZABETH WALPOLE RESIDENCE
1841 North Lincoln Park West
Built 1884

Good panel of special brick patterning under the cornice --rosettes. The line of the string course supports lintels carved with segmental arches, although the window heads themselves are flat. The frieze of the bay is a rich texture of corbelling.

ARCHITECTURAL SIGNIFICANCE

102. NATHAN EISENDRATH TOWNHOUSES
1842-44-46 North Lincoln Park West
Built 1873

Windows are segmentally arched and are punctuated with rough split faced stone keystones. Second and third stories have incised French hoods over the windows. There is no articulation between the buildings. Nathan Eisendrath was a brickmaker.

was a machinist.

ARCHITECTURAL SIGNIFICANCE

148. WM. J. BREYTSBRAAK RESIDENCE
228 West St. Paul Street
Built 1890

A two family walk-up with a richly articulated pediment over the bay. William J. Breytspraak was listed in the City Directory of 1890 as a Shirt Cutter.

ARCHITECTURAL SIGNIFICANCE

149. TONY BRUEGGSTRADT RESIDENCE
230 West St. Paul Street
Built 1894

The steamboat Gothic front porch of this rather Italianate brick building has various turned balusters, spindles, and a cast iron railing. Limestone facade with festoons under the windows. City Directory has "Saloon" after Mr. Brueggstradt's name.

ARCHITECTURAL SIGNIFICANCE

150. RESIDENCE
234 West St. Paul Street
Built 1886: Catherine Spelz

This residence is one of a group of plain and simply decorated brick buildings that includes 238, 240, and 242 West St. Paul Street. With minor exceptions, these match each other. Built by the same builder using the same architectural vocabulary, which includes a flat corbelled cornice, with the linking of the heads of the windows at the first story with a smooth faced limestone cornice and a low basement. The 1887 City Directory lists a Peter Spelz as a clerk.

Inventory—Nomination Form

Continuation sheet SIGNIFICANCE Item number 8 Page 37

157. MARY LANG RESIDENCE
1644 North Sedgwick Street
Built 1889

This building has both Joliet stone lintel and banding and decorative brick panels which shows its location on a more important street, an elegance befitting the Sedgwick location.

ARCHITECTURAL SIGNIFICANCE

158. RESIDENCE
1646 North Sedgwick Street
Built 1880. Felix Lang, Builder

Interesting contrast to #157, next door. Here all detail is spare as opposed to the opulence of its neighbor. The iron fence and gates are from the Episcopal Diocesan Center on Rush Street; torn down recently.

ARCHITECTURAL SIGNIFICANCE

159. CHARLES DEHNING RESIDENCE
1649 North Sedgwick Street
Built 1879

The building has interesting lintels with curique corners. It shows exuberance and spirit of the builders at that time.

ARCHITECTURAL SIGNIFICANCE

160. WILLIAM PAGE RESIDENCE
1708 North Sedgwick Street
Built 1888

Rectangular, three-bay front, two and a half stories. The top elements of the Mansard conceal the pitched roof. Arched windows, projecting wooden cornice with paired wooden brackets. Baroque Georgian detail that adds an emphasis of dignity to facade and cornice in keeping with the very elaborate keystones.

170. JULIUS BAUMER BUILDING
1756 North Sedgwick Street
Built 1884

The immediate ancestors of this two-story brick building are in northern Europe and are Flemish or Dutch, complete with the iron ties and stepped pediment. The sill of the front window is lower than the other sills, perhaps for hauling furniture to the second level. Originally a storefront with living quarters above, it has horse stables in the rear. Julius Baumer is listed as being in Wallpaper.

ARCHITECTURAL SIGNIFICANCE

171. JOHN BUSCH BUILDING
1758 North Sedgwick Street
Built 1884

The only intrusion in this brick storefront with living quarters above is the wood infill replacing the large panes of glass. It is interesting to note that the east facade is of a nicer quality brick, as compared with the facade on the north which is common Chicago brick. The occupation listed for John Busch is Saloon.

ARCHITECTURAL SIGNIFICANCE

172. FRANZ DEPPE BAKERY
1759 North Sedgwick Street
Built 1881

A handsome brick building with limestone trim and various kinds of ornament. This proud commercial structure has the name of the first occupant proclaimed on the facade lunette, i. e.: 1881 - DEPPE. Even though the large expanse of glass that once existed in the shop windows has gone, the slender cast iron Corinthian columns bear witness to their original location.

FIRE RELIEF SHANTIES

Within days after of Chicago Fire of 1871, small cottages known as Relief Shanties sprang up in the neighborhood. For about \$75. the city would construct a relief cottage for people who had been left homeless. They also served as distribution centers for food and clothing.

One such cottage is still standing in the District, while several other structures are thought to be probable relief shanties, but difficult to document.

1639 North Sedgwick There is strong evidence, supported by interviews, that this was a Relief Shanty.

1801 North Sedgwick contains a back building which is a documented Fire Cottage, constructed in late 1871 or early 1872.

216 West Menomonee Part of the building is believed to be a Fire Cottage.

225 West Eugenie The back building is reported to be a Relief Shanty.

1806 North Lincoln Park West The back building is probably a Fire Relief Shanty. Paul M. Angle, late Director of the Chicago Historical Society, lived for many years next door. Mr. Angle was convinced of that use of this structure.

Old Town Triangle Historic District Committee Preparers:

Mrs. O. M. Forkert, <u>Chairman</u> 1836 Lincoln Park West (60614)	Home Telephone Office 642-3117 922-8993
Mrs. Diane Gonzalez 218 W. Menomonee St (60614)	337-5962
Mr. William G. T. Hyer 1828 Lincoln Park West (60614)	664-1028
Mr. Don McDougall (Perkins & Will) 1818 N. Wells St. (60614)	751-0762 977-1100
Mr. Walter Netsch (Skidmore Owings & Merrill) 1700 North Hudson Street (60614)	944-7924 641-5959
Mr. Kevin Sarring (Harry Weese & Associates) 300 North State Street, #4704 (60610)	644-7185 467-7030
Miss Leigh Sills 315 W. Eugenie Street (60614)	337-0131
Mr. Thomas Welch (Holabird & Root) 1743 N. Sedgwick Street (60614)	751-0894 726-5960

INDEX OF GROUP LETTER CODES

Group letters are cross-referenced between the map of Significant structures and its corresponding list.

Letters are cross-referenced with lesser detail on the list of Contributing structures.

<u>A</u>	St. Michael's Church Complex		<u>Built</u>
	a. 1615 N. Cleveland	Residence & School	1893
	b. 1633 N. Cleveland	Office	1896
	c. 443 W. Eugenie	Sodality Hall	1899
	d. 447 W. Eugenie	Church	1872
	e. 458 W. Eugenie	Convent	1892
	f. 1640 N. Hudson	High School	1928
<u>B</u>	Brick buildings		
<u>BF</u>	Brick and Frame		
<u>BS</u>	Brick with stone facing on front		
<u>C</u>	Crilly blocks		
<u>D</u>	Dwellings with livable rear buildings		
<u>E</u>	Store fronts with living quarters above		
<u>F</u>	Frame buildings		
	a. 1 story		
	b. 2 story		
	c. 3 story		
	d. Fire Relief Shanties		
	e. Menomonee Row Streetscape		
	f. Hudson Row Streetscape		
	g. Mohawk Row Streetscape		
	h. Eugenie Row Streetscape		
<u>G</u>	Garages		
<u>H</u>	Horse Stables		
<u>I</u>	Churches		
<u>J</u>	Hotels and large apartment buildings		
<u>K</u>	Small apartment buildings (3 to 8 flats)		
<u>L</u>	Beaux Art / Deco		

INDEX OF GROUP LETTER CODES (Continued)

- R Rowhouse. The description of all rowhouses is given with the first of each group and each other one is numbered and refers back to the first
- S Simple alterations would make this building Significant
- T Altered brick work
- U Fenestration altered
- V Incompatible siding / aluminum siding
- W Front door alterations
- X Stairs to second story removed
- Y Miscellaneous alterations to front facade: fire escape, roof intrusion, cornice removal, etc.
- Z Difficult to restore
